STREAMLINER
STREAMLINER+

STREAMLINER

One half of the whole

Thanks to its suspension, the Streamliner is perfectly suited for mountain biking even in rougher terrain and extended touring. Once the child has grown out of the Single-trailer the fun really starts because the off spring can come along without the physical demands being too much for the child. In addition the children learn how to balance and the motor function is trained.

«Comfort, ergonomics and safety are of highest importance for the Streamliner. Extremely sophisticated trailer, like all products from tout terrain.»
Bike Sport News 4/11

STREAMLINER+

The better half

The Streamliner+ is the logical step on from the Streamliner: Simply attach the separately available Streamliner+ retrofit kit onto the Streamliner and your child will be independently on the move on his now beloved Streamliner. The 160 mm spring travel of the Streamliner remains available on the rear wheel, whilst the hugely responsive fork offers 85 mm spring travel.

«The suspension does not only allow trips into bumpy terrain but also protects the sensitive back of the children.»
Aktiv Radfahren 4/07

«Very good. Top quality, first-class components, very light and two bikes in one.»
Aktiv Radfahren 04/09

For children from 4
(inseam min. 35 cm) to
approx. 7 years (max. 35 kg)
– Streamliner

For children from 6
(inseam min. 50 cm) to
approx. 10 years (max. 45 kg)
– Streamliner +

Easy handling due to the
very low weight of 8.9 kg

High quality air
suspension for
infinitely variable
adjustment to the
body weight

Ergonomic, smooth-
running and child-friendly
components with high
performance brake

High quality CNC-produced
joint with ball-bearing for
connection to the bike

Compatible with
29" bikes

160 mm spring travel
